Napalm

- NAPALM - Network Automation and Programmability Abstraction Layer with Multivendor support
- Open Source Python Library
- **Unified API** for multiple vendors: Cisco, Juniper, Arista, Fortinet ….
- **For Cisco IOS it uses netmiko** because there is no API available for Cisco IOS.
- Methods to manipulate configs
- Methods to retrieve data
- It works with the most popular automation frameworks like **Ansible**, **Salt** or **StackStorm**
